PROFESSIONAL EXPERIENCE

Front-End Developer | CFIT — Lahore, Pakistan

18 Feb 2025 – Present

- Build and maintain responsive web pages using HTML5, CSS3 and JavaScript for cross-browser and mobile compatibility.
- Design and implement interactive features including modals, sliders and form validation to improve user experience.
- Customise WordPress themes and plugins, configure functionality and resolve layout or website issues.
- Optimise websites for performance, SEO and accessibility, with focus on loading speed and usability.
- Debug front-end issues including broken layouts, conflicting scripts and responsive design problems.
- Integrate third-party APIs and services where required.
- Collaborate with designers and back-end developers to deliver projects smoothly.
- Use Git to manage code changes and maintain clean, reusable code.
- Use PHP and JavaScript to extend WordPress functionality and create interactive website features.
- Apply React.js concepts through practical projects while transitioning into modern front-end development.

Jr. Broadcast Engineer | Dunya News — Lahore, Pakistan

13 Mar 2024 – 29 Jan 2025

- Supported senior broadcast engineers in operating and maintaining broadcast systems, equipment and infrastructure.
- Troubleshoot and resolved broadcast equipment issues to support uninterrupted on-air operations.
- Performed routine maintenance, cleaning, calibration and software updates to maintain equipment performance.
- Assisted with installation, setup and configuration of cameras, switchers, audio mixers, routers and servers.

Intern — Front-End Developer | Access Group SMS Limited — Lahore, Pakistan

01 Feb 2023 – 01 May 2023

- Worked with SQL queries and basic DBMS operations to fetch, insert and update data.
- Assisted in building and testing front-end features while maintaining design consistency.
- Collaborated with the team to resolve UI and layout issues identified during testing.
- Gained practical experience integrating front-end interfaces with back-end database connections.
- Documented tasks, bugs and solutions and followed clean, maintainable coding practices.

SELECTED PROJECTS
